## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The reissue claims that are the subject of the Appeal, namely claims 10-19, are narrower than an original application claim in an aspect germane to a prior art rejection, broader in an aspect unrelated to the rejection. Therefore, under the principles provided by the Federal Circuit in *In re Clement*, when a reissue claim is broader in some aspects but narrower in other, you examine the reissue claims to determine if the reissue claim(s) is narrower in an aspect germane to the prior art rejection, and broader in an aspect unrelated to the rejection. If this scenario exists, the recapture rule does not bar the claim. Upon review of the prosecution history, the reissue claims are narrower in that they recite only the eye conditions from a Markush group recited in a cancelled claim of eye conditions, reversible obstructive airway diseases, nasal diseases and colon diseases; and are broader in aspects unrelated to the prior art rejection, namely the composition itself. Therefore, the recapture rules does not bar the reissue claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
